

Biopsy Instructions

- You have had a skin biopsy to evaluate a rash or skin lesion. To care for the site, wash gently with a mild soap, pat dry and apply Vaseline or Polysporin. **DO NOT USE NEOSPORIN.** It is best to keep area moist and covered to prevent scab formation and allow the area to heal.
- It is normal to experience mild discomfort of the biopsy site. Some stinging or burning may be felt. If the area becomes very red, painful or drains pus contact our office immediately and ask to speak with the nurse 205.871.7332.
- You should either receive a phone call, email or letter from our office informing you about the results of your biopsy. If you do not hear from us in 2 weeks, please contact us.
